Stillwater, OK 74074

**OK Notice PL-147**

**For:** County Offices

**GIS Impact on CCC-502 Updates**

**Approved by:**

**1 Overview****A Background**

A potential need for CCC-502U's to reflect the addition or reduction of cropland has resulted as counties complete acreage determinations using GIS.

**B Purpose**

The purpose of this notice is to provide guidance on how to achieve updating the CCC-502 to reflect the addition or reduction of cropland that has resulted from GIS acreage determinations.

**2 Action****A County Office Action**

Farming operations for which a cropland factor has been applied according to 1-PL (Rev. 1), paragraph 134 are those most urgently affected by the new GIS acreage determinations. CCC-502U's are required now for those farming operations so a determination can be made whether the addition or reduction of cropland has affected the application of the cropland factor.

CCC-502's and CCC-502U's for all other farming operations for which the acreages have changed as a result of GIS determinations ARE NOT required. However, as producers conduct other routine business with the county office, the current CCC-502U or CCC-502 can be documented with the following statement: "Acreage revised through GIS." The acreage revision shall be noted on the current CCC-502 along with initial and date of the producer.

**Disposal Date**

July 1, 2005

**Distribution**

County Offices

11/2/2004
